How To Remove Language Barriers While Learning, Using Google And Open Source Technologies

Rahul Arulkumaran, FreeFlo

Wondering Who I Am?

Don't worry! I've got you covered

Undergrad Student

President - Enigma

Full Stack Developer

Data Science and ML
Enthusiast

Managing &
Contributing Member

What Is FreeFlo?

- Product based startup
- Founded in March 2018
- Build products that solve a problem within a particular community

Let's Jump To The Main Part Now!

- What are we doing and how?
- Problems while learning about something
- Costs and Language Barriers
- Open Access Journals

Open Access Journals

- What are OAJs?
- Peer Review
- Anyone can view it for free
- To get it published, one might be charged with a publication fee

Cost Factors

- Open Access Journals
- Different payment models
- Entirely free platform
- Upload and download for free

Language Barriers

- Not everyone finds it easy to read/write in English
- How we solve the problem?
- Using Google's **Cloud Translation API**.
- 6 regional languages supported as of now.

हिन्दी तमिऴु తెలుగు ગુજરાતી
मराठी बांग्ला

How we built this?

- The technologies we used to build the webapp are :

- We also use Neural Nets for parsing documents.

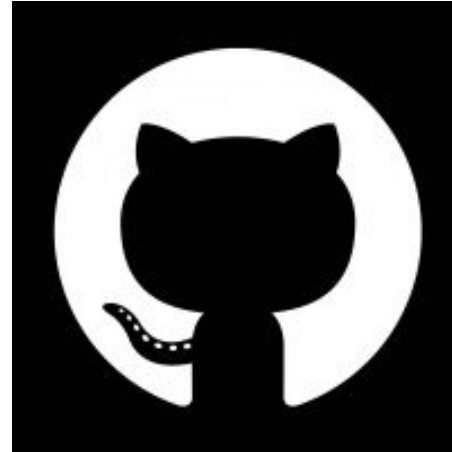

Future Plans for this product

- Get more colleges to adopt this platform.
- Exploring the usage of blockchain in this product.
- Automating review process
- Get some investment too!
